WORK EXPERİENCE

Nefarius Apps
Jan 2025 - Present

iOS Developer

Developed, maintained, and optimized iOS applications, designing user-friendly interfaces with UIKit and Swift while improving performance through code optimization. Additionally, conducted ASO research and keyword optimization to support app store strategies.

iBootcamp
Nov 2024 - Feb 2025

iOS Developer Trainee

I participated in an iOS bootcamp where I received training in both technical and soft skills. The program covered version control, project management methodologies, and interview simulations, along with guidance on building a professional online presence through LinkedIn and X.
Technically, I gained proficiency in Swift, OOP, architectural patterns (MVC, MVVM, VIPER, Clean Swift), UIKit (UI elements, Storyboard, programmatic UI), network layer design, localization, unit testing, and Xcode.

Fırat Üniversitesi Dijital Dönüşüm ve Yazılım Ofisi
Jun 2023 - Aug 2023

iOS Developer Intern

I developed a Deprem Hasar Tespit application using Swift, UIKit, and MapKit to create a user-friendly interface and map features. The project incorporated Firebase for backend integration, URLSession for API communication, and followed MVVM architecture with the Delegation Pattern to ensure scalability and maintainability. Dependency management was streamlined with Swift Package Manager (SPM).

EDUCATİON

Fırat University
2021-2023

Computer Programming

CERTİFİCATES

Feb 2022 | Appcent Akademi   **iOS 101-MOBİL UYGULAMA GELİŞTİRME**

Feb 2022 | Appcent Akademi   **iOS 201-MOBİL UYGULAMA GELİŞTİRME**

Mar 2022| BTK Akademi   **Swift ile iOS Programlama**

PROFİLE

I have foundational knowledge and experience in iOS application development using UIKit and SwiftUI. In addition to my internship, I have participated in various training programs and bootcamps to enhance my skills in mobile app development. With a passion for problem-solving and learning new technologies, I aim to create user-friendly and innovative mobile experiences.

SKİLL

- Swift, SwiftUI, UIKit
- Solid Principles, OOP, POP
- MVC, MVVM, VIPER, Clean Swift
- Localization, Network Layer, Unit Test
- Git, Git Flow
- Firebase, Alamofire, Snapkit
- Agile, Kanban, Scrum, Trello, Notion

LANGUAGE

- Turkish - Native
- English - Limited Professional Proficiency
